Medical-Grade Ceiling-Mounted Air Disinfectors

Unrestricted human-machine coexistence

zero ozone medical grade air disinfection machine

Q6060D

Product overview

It has the functions of sterilizing, removing odors, eliminating organic pollution, and purifying indoor air:

① It can kill common bacteria in the air. ② It can effectively degrade harmful substances in the air. It can also effectively intercept various fine particulate matters in the air. ③ Combining photocatalyst and activated carbon filter, the photocatalyst can decompose harmful gases and some organic pollutants, while the activated carbon filter can specifically adsorb odors, achieving multiple air purification effects.④ It is equipped with an electrostatic dust - removal module, which can adsorb impurities such as dust in the air through electrostatic action.

Product features

Human-machine coexistence

0 ozone generation, 0 pollutants, 0 electromagnetic radiation, truly achieving human-machine coexistence

Concealed installation

It can be discreetly installed on the ceiling, saving space and enabling more efficient use of limited indoor space

Disinfection Rate>99.99%

Certified by authoritative organizations, achieving a sterilization rate of over 99.99%.

Intelligent monitoring

Real time digital display of formaldehyde particulate matter onmobile app, showing various pollutants clear at a glance

Remove formaldehyde and allergens

Disinfection can effectively remove toxic gases such as formaldehyde and various allergens from the air

Silent and durable

It operates stably with sleep - level silent purification. The all - metal, corrosion - resistant shell is sturdy and durable

Technical Parameters

Product Name(Model)	Q6060-D (Flagship Version)	Noise	≤55dB
Effective Space （m³）	≤210m³	Input Power Supply	Supports 100 - 240V
Disinfection Module	275nm Deep Ultraviolet UVC-LED disinfection module	Input Power	≤265W
Filter Type	Primary filter screen + activated carbon filter screen + HEPA filter	Lifespan of the Disinfection Module	> 30000 Hours
Air Quality Monitoring	Temperature, Humidity, Formaldehyde, PM2.5, TVOC	Intelligent IoT Management	Optional
Wind Speed Levels	3 Levels	Control Method	Remote control + Bluetooth (4G optional) + APP
Lighting Integration	Optional	Dimensions and Weight	60cm*60cm*22cm，28Kg

Application scenarios

MASSPHOTON LIMITED

Unit 542 of Building 5W , 5 Science Park E Ave,Hong Kong Science Park
